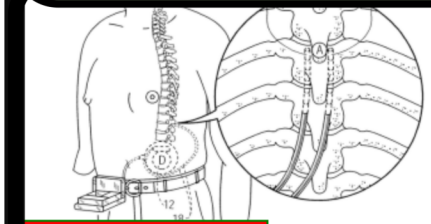
Spinal Cord Implant



RISK SCORE: **10**

Inventor: xxxxx **Year:** ~????

Originally an implant in the spinal cord (medulla spinalis) that could force an >>> **orgasm** <<< (they talk expicitely about "sexual things" to make the people focus on that (m107 Card) and to obfuscate that the whole body can be remote controlled by such technolgy), patented 40 Jears later 1999 under US6169924. Today maybe encanced with more than just that "wire" (US Army researches in this field) Output; the victim can be "used" as a robot / soldier / killer or sex slave with a 3D model of the victim in a 3D environment (like games) if all people would have such thing they could create a weapon out of such technology and unfortunately kill billions in a few seconds. Hopefully those who created this system considered that vulnerability. Mobile phone could act as UpLink to a mainframe (the US Army maybe uses the Cry-Engine with PhysX for the "Simulation")

To scan a human body, hopefully siemens does not have some sort of stuxnet virus here that filters implants and wires that were illegaly implemented. Algorithm would be some interpolating algorithm that removes the implant and shows normal brain.

But unsure about that so far...

(Cyber-)Isolation Cell Padded Cell

Inventor: ???? **Year:** ????

Mental Institutions have Padded Cells or Isolation Cells where they put patients in. I was several times in such a Cell, the funny thing in Switzerland is, that the padded cell is not even padded. They say it's for people that would like to commit suicide, they even lock victims with straight jackets. It's about sensory deprivation, sensory deprivation is psychological violence or also some sort of behavioral "sciences". IMHO it would be better to put the people who vicimized the victim into jail.

They do the same thing with your contacts, there are several ways to isolate people from their social network and even from their family. I'm not quite sure, but i guess if they put you in a Isolation-Cell, the Network automatically isolates you for example also in your Socail Network or the Internet. On the other hand empirical value can't be taught

Fill-Gun

t27

Inventor: xxxxx **Year:** ~????

Fill-guns are sold as a Ring on a chain, for example in Tolkien's "Lord of the Rings". In fact would be a black box with socket and reset button to delete the keys on fill-gun. (Hopefully one has implemented an enhanced delete function) If you put fill-gun into a Military-Radio (SE235, or t25 / t26?) with frequency hopping the Cryptological Keys are loaded and radio would join to Military Network. Frequency hopping would allow to tranmit to golden wires (e4) in the body. **Main question would be, if the fill-gun loads a radio, where are the fill-gun loaded**. Afaik Urs B. told me once that the Zurich Insuranse has two specially secured terminals. Male Lobsters (bio1) thend to show off with objects of power to compensate their low self-esteem, in Bière an officier also showed off his Fill-Gun proud. I / We guess that the Fill-Guns gives the owner access to all owned soldiers.
