1950s Design Psychology

Design Psychology...

Inside the world's quietest room
Deep below Zurich, IBM has built the stillest, most shielded rooms in the world.

Series:
Get Smart (English)
Mini-Max (German)

...or how the CIA
could install the "programm agent" ⇨
in the head of our "lovely" 1950s

wrong ar

Inventor: Satan **Year:** ~????

So first the Agent in Matrix (Agent Smith) is somehow to young and to make the Agents feel superior such institutions have specific design, so possibly one would find out quite fast if a company is payed by the NSA/CIA just by looking at the design of the building and the design of its rooms...

not yet 100% sure about that....

Crypto Beginners-Toolkit

Crypto **Beginners Toolkit**

dc10

https://0x8.ch/HackersCardgame10

Inventor: Satan **Year:** ~????

You can do easy for example create a ROT13 encryption, that of course can be broken in seconds, but to begin with crypto it's maybe a good excercise, then continue maybe with Vigenère cipher, and then p-boxes and s-boxes.
Be careful, if you begin with crypto eg your local military would like to own you and to prevent that you dont join the crypto-anarchy movement.
Work in pairs of at least 2 people, If they want to put you in mental institution to erase your brain you have better chances to prevent that.

i dont have a lot of time *INSERT: since they target me permantly* <- psychological warfare but if you have time it's quit easy to write something to encrypt and decrypt rot13, alphabet has 26 letters, so if you double-red13 you have again the original...

Aledged Domain Model of my homeland...

JOKER CARD

https://0x8.ch/HackersCardgame10

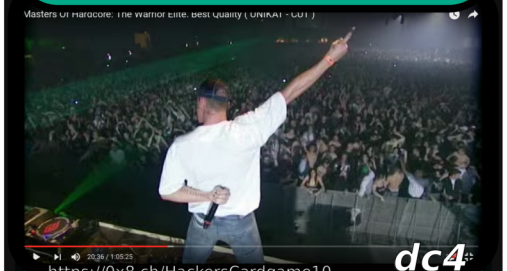
Inventor: ME!!!!! **Year:** ~NOW

If you are younger than 40 feel **FREE TO SAY AS MANY WRONG THINGS as you like**. It's not up to you, to teach or to fix people that are older than you how they could have done things better, but do it better yourself and give this card also to the younger generations and don't make the younger generations clean up your mess like the 1950s Generation did to us:https://de.wikipedia.org/wiki/Sonderm%C3%BCldeponie_K%C3%B6lliken

Use Cases

If an older Person gives you a bad feeling, if you said something wrong, it's not worth it to invest your time into his "lessons". often the teacher (Sophist opposite of a philosopher) just compensates his own self-esteem at the expense of his students...

Military People at Technoparties



dc4

https://0x8.ch/HackersCardgame10

Inventor: Satan **Year:** ~????

Possibly this unnice guy is on cocaine and thinks he installs psychological malware to the kids at that party. In fact he is just the scapegoate but does it intentionally. Remote Controlled by t1 card. if you find this video you will find out what i mean, listen to what he says.

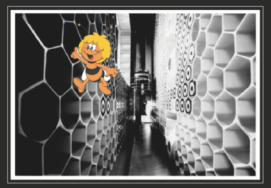
All the things i wrote to that noted here seems to be deleted: http://marclandolt.ch/doc/mastersOfHardcore.html

important thing would be that possibly all the young people from this party was owned mit hardware-, software- and psychological backdoors.

if true we need a resuce mission.

Vintage Computing

IBM Mass Storage System 3850 (80ies)



...meanwhile Willi is having a yellow honey snack.

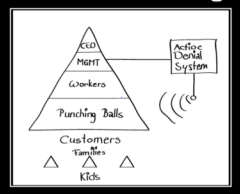
Inventor: Satan **Year:** ~????

Vintage computing would maybe help to find the network of people that did so much terror to the world

we should change that

Modern Slavery



...or why we should care about our Net-work Infrastructure.

thitle sould say everything

WOBBLER SWEEP GENERATOR

t20

https://0x8.ch/HackersCardgame10

Inventor: xxxxx **Year:** ~????

Generates a sweep and then the echo of this sweep is evaluated to evaluate the whole system. More modern devices are beeing used in eg. docsis networks.

If you project this principle on wires/antennas that that have been placed below the skin and eg. a webcam as return channel you could maybe even portscan humans or hijack their telemetry

Today we expect that digital technologies are used, but the old things maybe still up and running
