 If a NSA/CIA would have access to all peoples data, even the private diaries they would maybe install some AI that analyzes what the whitehat hacker just says, writes or thinks
 Then they would try to match that on persons in his / her network that would get a cognitive dissonance because of that sentence or concept knowledge even when i dont write names in my diary
 CIA would possibly know what person or eg, Meyer-Briggs archetypes would rage because of what i just written into my privat diary. So it would be possible that the CIA/NSA would intentionally send this private diary entries to people to "motivate" them to attack me.

 If something like **Medulla Oblangata** or **Medulla Spinalis** **implant** (**Spinal Cord** **implant**) would exist, they would need some sort of **Matrice Operations** (**Jacobi Matrices**?) to calculate the **Body Movement**. In my particular case i guess there is a **malware**, that is activated when they use m99 to target me. They seem to change the sign of one axis or making me steering me into singularities after about 15 minutes after i started to do body care to make me hurt "myself". So maybe it's just one of those additional Networks that is 99.9% of the time silent, that overpowers the signal i should receive with a value that has an additional minus sign for that specific axis. But not yet sure about that.

Access Based Enumeration Part 2

 Depending on the authorization (or the **security clearance**) of a user, folders are shown or not shown in a Windows Network. If you would implement that on a client computer, you could do much more dirty tricks. For example if a **Pedophilia Victim**, a **Torture Victim** or a Victim that was Subject to **illegal Human Experiments** would find out who did that all to him they would maybe want to keep the victim silent. So they would **upload for example pedophilia Images on the computer of the victim**, and would find the pedophilia content. If the Victim would look at the same Folder on his Computer, the Access Based Enumeration algorithm would hide this images, so he would not know and **the jury (m37 card) would judge the Victim** of Pedophilia when he was 10 years old, the would help to hide the illegal human experiments ...

Suicide Death BOT

 If a person can be controlled or at least influenced by some technology cards * evil people unfortunately could create some sort of a suicide death bot, using things like m38 card for priming to make innocent people to commit suicide (attempts). We think that this is the major way eg. CIA kills people that know to much and the reason news are normally not telling the story from people that committed suicide (maybe they killed Ian Murdoch with a suicide death bot). People with lower rank would be told that it's just training or BDSM. But in fact if the Whistleblower would die the whole group would be lost too and so controllable by eg. the CIA, worst case m37 && dt1 card. Those groups that already have "trained" a kid to death would never confess. Forced to keep silent. Possibly the code of such suicide death bots would be **packed into proprietary non-deterministic crypto both personalized or generic**, eg. m38 would be generic. Was Jan Murdoch* @Debian also a victim?

SYSTEM-THEORIE

 A **System** is made out of Elements [E] or several Subsystems (= abstracted an Element too). The Elements have relations (**Relations** [R]) and the relations have (German: **Konditionierende** [K]) that describes how the Relations have to be. The Law or the Bible or the Koran(?) or Karl Marx "Das Kapital" could be such a "Konditionierende". This helps to understand the big picture, Social-, Mechanical-, Biological-, Computer- Systems or Software.
 For example if you have **QuantumInserts**, **Tarnoil Turbine** you could also filter or inject words that would make the victim look or drive insane.
