

Hierarchy

a13

Inventor: Satan **Year: ???**

Hierarchical Systems tend to lack Moral. Most Companies have hierarchical structure often they abuse small left wing people in the lowest rank to make the customers think that the company and its management is good and trustworthy. In case such a left wing punchingball would upgrade to a Whistleblower and find out about the dark management and that they abuse the young people as such punching balls they would possibly attack him with a16, m38, t15.... Maybe played with a14, which means that there will be also some bad left wing people.

The Sad thing is, that this is business as usual.

NORMAL-DISTRIBUTION

a1

Inventor: Carl Friedrich Gauss **Year: ~1801**

E.g. the distribution of intelligence in society is normal-distributed. If you would find out that people that run amok or suicide quite often after they have been "theraped" by mental institutions and then they are shut away maybe in the same mental institution after they run amok more than the normal-distribution would predict, then you maybe should really ask some questions. Personal Traits (eg. Mayer-Briggs) are norami-distributed too. So these formulas are quite useful to find out if one tells the truth or not. But it is not evidence, but maybe something one should investigate.

Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)

For example the Jus Prima Noctis Card (some sort of psycholog design pattern) some assholes use to forced her own daughter after they attract me with a computer course and then they used this permanently changing design pattern over a period of 20 years to snipe me away from the things i was doing in this moment. That is the prove that there are "white"-torture design patterns Julian Assange talked about at HITB SecConf 2009 Malaysia...

Observer Pattern

a18

Inventor: Erich gamma, Richard Helm ... **Year: ~1994**

The observer pattern (also called listener pattern) is a design pattern in software development. It belongs to the category of behavior patterns. In the programming language Java it would need an interface (public interface Observer) and it would be used with "implements Observer" (needs exercise and maybe qfire, quantuminserts, Turbine, Tarmoil tries to make it hard for you to learn) It does not mean "surveillance" its a computer science Term, but of course such a design pattern can also be abused for surveillance, and eg trigger a16 Card.

To use Design Patterns you first need to learn an OOP Programming Language

ARTIFICIAL INTELLIGENCE

a11

Inventor: Isaac Asimov? **Year: ~1960**

Artificial Intelligence, but also Propositional calculus or (German) Prädikatenlogik (= eg PROLOG) or learning algorithms, the so called singularity is maybe already here, which would explain why I wept when in the end of the Movie "Artificial Intelligence" finally sees his "Mother" again. But this should not be his mother, but his equal aged mental mother that showed him the women side of the world so many years ago. Companies are Artificial Intelligences too, but mostly from the dark side of the force. If you want to learn it maybe begin with mini-max-algorithm and Tic-Tac-Toe

Control your touring complete Avatar and say something if he/she/it suggests wrong things like violence, murderer, amok...

Dieses Spiel besitzt offensichtlich keinen Sunelpunkt (warum?). Weder Jäger noch Bomber haben reine Strategien, die sich nicht durch den Gegner zu dessen Vorteil ausnützen lassen, wenn dieser die Strategie im voraus erfährt. Beide Parteien

Ezak Imak (Kami Kaze in reverse) VS Hun in the Sun The Japanese Attacked the US Airforce most from bottom up 95% but sometimes from the top to bottom 5%, so the US Airforce had to watch both sides. Today mental institutions use the same algorithm for psychological warfare. 95% Patients are Victims, 5% are forced to run amok <https://www.springer.com/us/book/9783764353384>

Same Algorithm can also be used in Psychology, Politics for example 95% Slaves in Companies and 5% small hitlers

Suicide Death BOT - Spinal Cord

a16b

RISK SCORE: 10

Even more worse than a Suicide Death Bot that induces a Psychosis with Electrometrical/Psychological War to induce a suicide (attempt) would be some sort of Suicide Death Bot like Stuxnet that attacks the Spinal Cord Implants of eg. Whistleblowers, Whitehat Hackers or people that asks "to many" questions or people allied with such people, I mean with "rapist-terrorists".
